

TAR-OX

# FOREWORD

TAROX performance brake discs are sold only in pairs. Each part number comprises of a 4 digit code - this designates the correct fitment - and at the end of the part number a suffix is attached to determine which surface finish is required e.g. 2603 SJ - for drilled and grooved discs to fit a Mitsubishi Lancer Evolution VI-X.

Below is a list of the disc style suffix

<b>G88</b>	G88 40 Groove disc
<b>SJ</b>	Sport Japan Drilled and slotted disc
<b>FMM</b>	F2000 spiral groove disc (usual grooves between 7-9)
<b>ZRO</b>	Zero plain surface discs often referred to as group N

## **FITTING GUIDELINES**

Ensure the new disc corresponds to the vehicle on which it is being fitted.

Always replace discs in axle sets - failure to do so can result in dangerous, uneven braking.

The hub of the vehicle should be cleaned and any traces of brake dust build up, dirt or rust removed before mounting the new discs - failure to do so can result in excessive disc run out and lead to vibration. When assembled check the run out of the disc, and if necessary remove the disc, reclean the hub and reassemble: if this stage of fitting is not carried out correctly it can result in vibration from the discs after 3000-4000km.

TAROX guarantees the high performance of its brake discs only when installed and used correctly and will not offer a warranty on parts used on track or with a non compatible brake pads.

## **BEDDING IN GUIDELINES:**

TAROX brake discs should be run in for a period of between 500km and 600km with short smooth braking action. Sharp or heavy braking in the early stages of bedding in can cause overheating of both the disc and pad which could compromise braking performance.

TAROX does not recommend the use of pads with artificial bedding in material; this method scrubs the surface of the disc and can cause damage to TAROX balanced-hand finished discs.

## **NOTES:**

Orders are accepted according to the Terms and Conditions of Sale which are listed at the back of this catalogue.

TAROX have provided as much information as possible relating to each individual part number and application. The specifications, year of manufacture and discs dimension are listed to enable you to supply the correct pad for your customer.

Part numbers, vehicle models and engine details change from time to time and although the information contained in this catalogue is, to the best of our knowledge, accurate at the time of compilation and publication, TAROX, its resellers, agents and distributors will not take responsibility for any cost in connection with fitting problems including - but not limited to - labour charges.

# INTRODUZIONE

I dischi freno TAROX sono venduti esclusivamente in coppia. Ciascun codice TAROX e' composto da 4 numeri - che identifica l'applicazione - e un suffisso che determina il tipo di lavorazione. Per esempio: 2603SJ identifica dischi freno Sport Japan per Mitsubishi Lancer Evo VII.

I suffissi che identificano il tipo di lavorazione sulla pista frenante sono i seguenti.

<b>G88</b>	G88 - 40 Righe
<b>SJ</b>	Sport Japan - Rigati e forati
<b>FMM</b>	F2000 - 7-9 righe ellissoidali
<b>ZRO</b>	Zero - Superficie liscia - Gruppo N

## **ISTRUZIONI DI MONTAGGIO**

Assicurarsi che i nuovi dischi siano dimensionalmente identici ai quelli da sostituire.

Sostituire sempre entrambi i dischi freno su ciascun asse. La sostituzione di un solo disco puo' creare squilibri e/o malfunzionamenti dell'impianto frenante.

Prima del montaggio del disco assicurarsi che il mozzo sia perfettamente pulito e libero da ruggine, detriti e residui di polvere di pastiglie in modo che il disco sia assolutamente planare rispetto alla pinza. Assemblare il disco e prima di fissarlo al mozzo controllarne la planarita': se necessario rimuovere il disco, e pulire ulteriormente il mozzo. Questa operazione e' molto importante e se non effettuata puo' comportare la vibrazione dei dischi dopo 3000-4000 km.

TAROX garantisce le prestazioni dei propri dischi freno solo se montati e utilizzati in modo corretto: qualsiasi garanzia non e' applicabile a dischi freno utilizzati in competizione o con pastiglie non compatibili.

## **CONSIGLI PER IL RODAGGIO:**

TAROX consiglia di rodare i dischi freno per i primi 500-600 km applicando in sul pedale colpi brevi ma decisi. Durante il rodaggio, si raccomanda di evitare frenate brusche o/o prolungate che possono surriscaldare i componenti dell'impianto frenante, compromettendone l'efficacia

E' sconsigliato l'uso di pastiglie a "rodaggio rapido" perche' hanno un' azione abrasiva sulla superficie del disco e possono comprometterne la planarita'.

## **NOTE:**

Tutti i prodotti TAROX sono venduti in conformita' alle Condizioni Generali di Vendita elencate in fondo a questo catalogo. Per ciascuna applicazione contenuta in questo catalogo si sono raccolte tutte le informazioni disponibili da una pluralita' di fonti. Le informazioni sugli impianti frenanti originali, specifiche tecniche e disegni illustrativi hanno lo scopo di mettere in grado il cliente e/o il rivenditore di identificare in modo corretto ed ordinare i componenti per la propria vettura.

Le specifiche dei veicoli in commercio, gli allestimenti, le dotazioni tecniche sono soggette a continui cambiamenti e, sebbene siano stati compiuti tutti gli sforzi per verificare l'accuratezza delle informazioni quivi riportate al momento della pubblicazione, TAROX - non accetta alcuna responsabilita' in relazione a qualsiasi costo sostenuto dal cliente a causa di uno o piu' componenti non idonei, incluso - ma non limitato a - spese di manodopera.
